Burnside Notes

Bob McCulloch and Bill Hughes left last week for High River to spend the summer.

Don't forget the Hard Times dance the W.I. are putting on Apr. 12th. Good prizes for best "hard-up costumes". Those coming in good apparel will be fined.

Mr. and Mrs. Schumaker have been spending a week in Calgary with friends and relatives.

The Hall Board are putting on a dance in the Lone Pine hall on April 5th.

Mr. and Mrs. James McCulloch returned on Monday from their honeymoon trip to Vancouver and Kelowna, B.C.

Mr. H. A. Pearson returned on Saturday evening to his home here

much improved after his recent illness.

The Junior U.F.A. met on Monday evening last. The next meeting will be on Wednesday evening April 10th, when there will be a very interesting debate, "Resolved that the horse is more useful on the farm than the tractor." Affirmative Otto Bittner and Mary McCulloch, Negative, Jim Mackie and Adam Schumaker.

The carpenters engaged by the W.I. are busy this week finishing the interior of Lone Pine Hall.

C. Wrightson and Son of the Premier Meat Market will be in their new shop on or about March 27th. The new location is 1 door south of Scrutton's, the Photographer.

Miss Inez Gagnier skis for the love of the thrill of the sport. Her instructor, Ivin Nelsen, engages in the sport professionally. Both, however, agree that the environs of Quebec are unexcelled anywhere in the world as a skiing or general sport playground. Besides tutoring the timid and giving periodic exhibitions of ski-daring, Nelsen, with his fellow professionals at the Chateau Frontenac, Messrs. Oliver Kaldahl and Arnold Stone, all of whom are internationally known, organize parties to such places as Montmorency Falls and other favourite skiing localities within a few miles of Quebec.

EASTER TERM PUBLIC SCHOOL EXAMINATIONS

GRADE I

Ready Workers — Donald Cruickshank, Barney Paterson, Milford Cressman, Dorothy Konshuh, Vera Sanderman, Bennie Wyman, Harvey Stevens, Earl Ziegler, Vera Sinclair.

Willing Helpers — Earl Cummins, Laurence Neufeld, Geraldine Crimmon, George Smith, Roland Cole, Eugene Durrer.

Busy Bees — Maurice Boettger, Joyce Cummins, Jack Edwards, Elizabeth Austin, Marcella Roper, Lois Cunningham, James Kattray, Clayton Dippel, Alice Tighe, Raymond Franklin.

Teacher—Ruth Liesemer.

GRADE II

Seniors — Lois Edwards, Frances Clarke, Mildred Traub, Betty Boorman, Eleanor Powers, Bobbie Wrightson, Muriel Brightman, Bobbie Madoche, Beatrice Hayes, Alma Cunningham, Beth Graham, Stanley Goudie, Albert Newton.

Juniors — Lorna Carleton, Bobbie Barrett, Cecil Smith, Myrtle Erb, David Walder, Ruth Finlay, Elbert Dedels, Dorothy Sinclair, Rita Crimmon, George Kercher, Bertha Moon.

Absent — Edna Fischer, Lloyd Fischer.

Teacher—Aleda Hugert.

GRADE III

Seniors — Betty Barrett, Winnie Adshead, Harold Erb, Norma Sanderman and Helen Teskey (equal), Donald Phillipson, Betty Patterson and Barbara Spence (equal), Josie Booker, David Wright.

Juniors — Russell Carleton, Teddie Fooks and Murray Caithness (equal), Florence Chamberlin, Gordon Cressman and Riley Moon (equal), Joe Crimmon, Donald Lamont and Laurence Gabel (equal), Frank Moon, Ida Ansell.

Teacher—V. H. Sexsmith.

GRADE IV

Hope Roppel, Cyril Sharman, Vivian Caithness and Mary Newton (equal), Norman Crimmon, Bernice Ziegler and Orrie Franklin (equal), Ethel Violette, Margaret Morrison, Betty Cummins, Orpha Gabel and Tommy Lamont (equal), Earl Dedels, Dave Graham, Dorothy Dippel, Rosalie Ansell, Raymond Bellamy, Jim Lamont, Elwood Burroughs, Jim Sinclair.

GRADE V

Arthur Boorman, Robert Fooks, Agnes Rempel, Rita Scrutton, Jim Wright, Bruce Clarke, Florence Konshuh and Martha Ansell (equal), Warren Matheson, Bill Ranton and Clarence Cunningham (equal), Joe Graham, Irene Kercher and Gordon Caithness (equal), Maisie Sinclair and Richard Walders (equal), Evelyn McGhee, Jack Booker, Alice Violette, Lorraine Durrer.

GRADE VI

George Boorman, Jean Lowrie, Edward Carleton, Annetta Sheils, Lorna Clarke, Videlle Franklin, Arthur Evans and Gordon Dedels (equal), Irene Bellamy, Paul Schellenberg, Herbert Carleton, Willard Franklin, Ronald Brightman, Vera Matheson, Kiffer Stauffer, Freda Smith.

Teacher—E. G. Evans.

GRADE VII

Jimmie Fooks, Goldwin Gabel, Helen Moon, Tom Pearson, Steve Wesley, Ruby Kercher, Gerald Boettger, Margaret Rempel, Lera Bishop, John Walder, Harold Sheils, Frank Carlton, Aylmer McMow.

GRADE VIII

Herta Schellenberg, Grace Renton, Herb Sinclair, Murray Kendrick, Howard Dedels, Hazel Hall, Louie Newton, Maitland Perrin, Gladys Carlson, Leonard Bersch, Jessie McCoy, Arthur Chamberlain, Lucilla Madoche, Sydney Hall, Reta Herber, Vera Lowrie, Bernice McGhee, Ruth Gabel, Hazle Coates, Frank Durrer, Willie Neufeld, Millie Lowrie, Lancelot Carlson.

C. R. Ford, Principal.

The bridge party held by the I.O.D.E. at the home home of Mrs. J. H. Lowrie was a decided success. The premier honors went to Miss O. Owen and Mr. O. M. Bird while Miss F. Reiber and Mr. H. Clemens won the consolation.

Feminine intuition is the quality that tells one of five daughters that the honk out in front is for her.

WEDDINGS

DICKAU—EDWARDS

A quite but very pretty wedding took place on Thursday evening, March 14th, at the home Mr. and Mrs. Chas. Dickau, when their son Lawrence and Miss Marie Alice Edwards, both of Didsbury, were united in Holy wedlock. Rev. H. E. Roppel officiated. Congratulations and very best wishes for a happy and prosperous wedded life are extended to this popular young couple.

PLOGER—WATTERSTREET

The marriage of Mr. Alvin M. Ploger and Miss Elizabeth Watterstreet, both of Big Prairie, Alta., was solemnized on Friday afternoon March 15th by Rev. H. E. Roppel in the Evangelical Parsonage. The bridal pair was accompanied by the mother and brother of the bride, also several close relatives of the groom. Mr. and Mrs. Ploger

School Act To Be Held Over For 1930 Session

Premier Brownlee announced in the Legislature Monday afternoon that the new School Act would be withdrawn by the government and held over till the 1930 session. During the Monday session the bill was debated by several members. The premier stated that during the interval the public could examine it thoroughly so the government would be in possession of the crystallized opinion of the people by the time the bill is again brought in next session.

Income tax last year brought the Canadian Government \$23,752,743.00. The two things at the end are ours.

will take up residence at Big Prairie. May success and happiness attend them.

HELEN RULLENS and HECTOR TOTTEN WESTERN CANADA'S LEADING Song & Dance Artists

A REVUE will be presented in the
Didsbury Opera House, Fri., Mar. 22; 8:15

Snappy Dances, including Novelty, Russian,
Tap, Comedy and Apache numbers.

Also latest song hits.

Admission:

Adults 75c, Children 35c

An
Outstanding
Example
of United Effort

**CHEVROLET
FISHER BODY
GENERAL MOTORS**
Combined to produce this Car

NO single organization could have produced such a car as this Outstanding Chevrolet . . . or offered it at such sensationally low price.

It is an outstanding example of the results of united effort.

The vast resources of Chevrolet, Fisher Body and General Motors were brought to bear on the problem of bringing six-cylinder quality, performance and prestige into the field of the low-priced car.

And the result is the Outstanding Chevrolet of Chevrolet History . . . a car of beauty and engineering excellence . . . a Six, in the price range of the four.

You do not know car values until you have inspected this amazing Chevrolet. C-18-9-290

The Evil Of Grain Mixing

Following the unsatisfactory result of grading the 1928 wheat crop of Western Canada, a veritable deluge of protest and complaint has poured in to Dominion and Provincial Governments, Wheat Pools, Grain Commission, Grain Exchange, and all farmer organizations. Merchants and business men generally, suffering because the farmers have suffered, add their protests. In all this volume of criticism perhaps no one feature has called forth more vigorous objection than has the practice of mixing.

It is quite true that everybody does not see eye to eye on this subject, and farmers themselves are sharply divided on the issue whether or not mixing should be absolutely prohibited and made an offence under the law. While many favor such a policy, others hold the opinion that if mixing was entirely disallowed there would be a terrible glut of low grade and no grade grain on the market, with resulting enormous loss to producers.

The Saskatchewan Grain Inquiry Commission has gathered within its own province a mass of evidence on this and allied subjects affecting the grading and marketing of Western grain, and proposes to carry its investigations further afield in Manitoba, Alberta, British Columbia, and Europe, in what is recognized as the most determined attempt yet made to find solutions to some of the acute problems confronting the Western grain grower. In due time the report and recommendations of that Commission will be laid before the legislative authorities.

There is, however, another form of mixing in regard to which there are no two opinions. It is unanimously denounced as an evil, and one that is costing the farmers of Western Canada many millions of dollars annually. Furthermore, control in the case of this particular form of mixing rests, not with Governments or Wheat Pools, or Grain Commissions, but with the individual grain grower.

The form of mixing to which reference is made is that indulged in by so many farmers of sowing seed of mixed varieties. Instead of sowing only pure seed of one good variety, the seed too frequently used is a mixture of different varieties, white wheats mixed with red wheats, with consequent loss in value of the crop harvested. Thus the original mixing takes place, not in country or terminal elevators, not on board ship, not in the world markets, but right on the farms of Western Canada.

Investigation over a number of years has established the fact that certain varieties are best adapted to certain districts. This information is available to every farmer. It is his for the asking from his nearest Experimental Farm. He should secure this information and then sow the variety which grows best in his district. He may not be able to afford to purchase sufficient pure, registered seed of that particular variety to seed his entire acreage this year, but he should get a few bushels of such pure, registered seed, sow it in a prepared plot, and thus increase his seed supply on his own farm.

The frosts of last Fall make it necessary that all seed sown this spring be first tested for its germinating qualities. Strong germination is necessary in wheat, oats, barley and flax. Strong plants having healthy vigorous roots withstand adverse conditions such as spring frosts, insects, disease, better than weak plants. Farmers will be well advised, therefore, to send samples of their seed grain to their nearest Dominion Seed Laboratory and have it tested.

There is still another form of mixing on the farm which is even more disastrous, that is the mixing of weed seeds with the grain through the use of impure and not properly cleaned seed. Governments and railways combine to run special seed cleaning machinery demonstration trains through the country. Governments build seed cleaning plants. Nevertheless, tons of weed seeds are sown annually, as well as mixed varieties of grain, as was definitely proven by the seed drill survey conducted in Saskatchewan a couple of years ago.

Western Canada farmers must begin at the beginning in dealing with this mixing evil. First, it is essential that all seed sown be of one good variety, thoroughly cleaned, with all weed seeds eliminated, and tested to demonstrate its germinating qualities. With the groundwork thus laid for the production of clean, high grade grain, necessary further steps can and should be taken to preserve the identity, grade and standard of that grain all the way from the farm to the ultimate world market.

It sometimes happens that a man's usefulness ends when his salary is raised.

An elephant's bath requires 150 pounds of soap and more than \$100 worth of the purest Indian oil.

Over \$40,000,000 worth of damage was done last year by fire in the British Isles.

The total acreage under pasture in Canada in 1928 was 9,528,042 acres.

Simple Precautions Against FLU Sore Throat — The Danger Signal

Health Authorities Point Out The Necessity Of Treating The Simple Cold At Its Beginning

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—then the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop will penetrate deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Of course it is always wise to take some relaxing medicine, and for this purpose immediate results will be secured from Dr. Hamilton's Pills—they purge the system of impurities and carry off a lot of disease—breeding wastes.

This combination treatment of Nerviline and Dr. Hamilton's Pills is very effective for Grippe, Influenza, Bad Colds, etc., and can be relied upon to give very satisfactory results.

Kaiser Cost Germany Millions Every Year

Abdication Has Saved Country Large Sum In Salaries

It has been figured that Germany in the last 10 years has saved \$125,000,000 in salaries to the former royal rulers of the empire. Before the war the Kaiser cost Germany \$5,264,000 a year. Then came three kings—of Bavaria, Saxony and Wurttemberg—and seven grand dukes, who cost Germany more than \$5,000,000. Besides these royal "appointments" the other expenses of the imperial system brought the annual expenditures up to \$12,500,000. Of course there had to be big armies and generally increased cost of royal show under the royal government but this further cost could hardly be estimated.

PARENTS UNDERSTOOD THIS BABY'S LANGUAGE

"We thought we were going to lose our baby, teething," says a Kentucky mother. "He couldn't digest anything and was getting thinner every day. After one of his fretful, crying nights, I thought of Castoria and got some. A few drops made him comfortable, and after a few doses, he seemed like a different baby." Doctors everywhere recommend purely-vegetable, harmless Fletcher's Castoria for colic, constipation, colic and other ills of babies and children, and millions of mothers know its gentle influence is best. Avoid imitations. The Fletcher signature is the mark of genuine Castoria.

Alberta Dairy Products

Exceeded In Value Twenty Million Dollars For 1928 Season

Alberta's dairy products for 1928 exceeded in value \$20,000,000, which represented 8.3 per cent. of total agricultural production. Dr. C. P. Marker, dairy commissioner, told delegates at the recent dairymen's convention in Edmonton. There was a marked improvement in the grade of cream supplied by producers and in the quality of creamery produced, he declared.

A DANGEROUS MONTH FOR THE BABY

Mothers Always Dread the Blustering March Days

No month of the year is so dangerous to the welfare of little ones as is March—the month of quickly changing weather. One day is fine, the next cold and blustery. One day dry, the next wet and disagreeable. In spite of all precautions the little ones will take colds and these colds often lead to more serious troubles. Mothers, when the first symptoms appear—sneezing, redness of the eyes, running nose—Baby's Own Tablets should be given at once. They will rapidly break up the cold and prevent the more serious complications.

Mothers who keep a box of Baby's Own Tablets in the home always feel safe—just like having a doctor in the house. The Tablets are a gentle but thorough laxative that sweeten the stomach and regulate the bowels, thus driving out constipation and indigestion and relieving the baby of the many childhood ailments which are the direct result of a clogged condition of the bowels or a sour stomach.

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Dairying In Okanagan District

The North Okanagan District is turning increasingly to the dairy industry with profitable results. Cream cheques totalling \$250,000 were paid out during the past year.

Miller's Worm Powders act so thoroughly that stomachic and intestinal worms pass from the child without being noticed and without inconvenience to the sufferer. They are painless and perfect in action, and at all times will be found a healthy medicine, strengthening the infantile stomach and maintaining it in vigorous operation, so that, besides being an effective vermifuge, they are tonic and health-giving in their effects.

By living on board private yachts moored on the River Thames, near Westminster, a number of Londoners escape paying rent, rates and house duty in return for a mooring fee of three guineas a year.

Minard's Liniment for the Grippe and Flu.

Education By Mail

B.C. Rural Correspondence Courses Cost \$13 a Pupil

Rural correspondence school courses in British Columbia, cost \$13 a pupil, while the ordinary public school student costs the province \$70, according to information tabled before the public accounts committee of the Legislature.

The committee was informed that 350 pupils in outlying parts of the province obtained their elementary school education by means of the correspondence classes.

Area Under Pasture

The total acreage under pasture in Canada in 1928, was 9,528,042 acres.

Reduce Aviation Expenditures

British Government Decides To Lessen Appropriation For This Year

British estimates for government aviation expenditures during 1929 presented to the House of Commons by Sir Samuel Hoare, air secretary total \$81,000,000. This is a decrease of about \$250,000.

In connection with the estimates Sir Samuel said the new airships the R-100 and the R-101, should be completed early in the financial year.

"The two airships should begin the trials in the spring and I hope to see the flights to overseas bases, such as Montreal and Karachi, achieved during the year," Sir Samuel added.

NICE WORDS WON'T DYE a dress or coat...

Neither pretty pictures nor colorful adjectives will dye a dress or coat. It takes real dyes to do the work; dyes made from true anilines.

Next time you have dyeing to do, try Diamond Dyes. See how easy it is to use them. Then compare the results. Your dealer will refund your money if you don't agree they are better dyes.

You get none of that re-dyed look from Diamond Dyes; no streaking or spotting. Just fresh, crisp, bright new color. And watch the way they keep their brilliance through wear and washing. They are better dyes because they contain plenty of real anilines—from three to five times more than other dyes. But you pay no more for them than for ordinary dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. Remember this when you buy. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

Diamond Dyes

HOUSE PASSES BILL FOR C.P.R. BRANCH LINES

Ottawa.—The Canadian Pacific Railway bill for branch line extensions completed its passage in the House of Commons, when it was given third reading. The bill emerges intact, with the exception that the proposed Sutherland-to-Melfort line in Saskatchewan was eliminated in the commons committee. The bill now goes to the senate.

The measures authorizing the Canadian National branch line developments still stand for third reading on the order paper in the commons. The bills have been held up on account of the budget debate, but will likely soon be accepted and also passed on to the senate.

The C.P.R. bill, being a private one, came up during the hour in the house set aside for private members' bills. It passed with little or no discussion.

The house also quickly gave third reading to the bill which will incorporate Barclays Bank (Canada) without amendment.

Radiogram Received From the Antarctic

Welsh Society Of Saskatoon Gets
Message From Scientist With
Byrd Expedition

Saskatoon.—A radiogram from the Antarctic, relayed by mail by the New York Times, has been received by Thomas Phillips, Saskatoon, from Frank Davies, in which the latter wishes the Saskatoon Welsh Society a joyous reunion for 1923.

Mr. Davies, at one time an instructor on the University staff here, and now a scientist with Commander Richard E. Byrd, in his expedition to the South Pole, sent the message on February 28 from "Little America," Antarctica, and it was received in New York on March 2, too late for the local celebration, which took place March 1. The document will nevertheless, form a valuable item in the archives of the Welsh Society in Saskatoon.

Telephone Service Increased

Hundred Line Extension Has Been
Completed At The Pas

The Pas, Man.—It was announced by H. Coddington, commercial superintendent of the Manitoba Telephone system, that arrangements for another hundred line extension on the switchboard in The Pas exchange are complete.

"When we took the plant over last July, we had 237 subscribers," said Mr. Coddington. "Today we have 395, and it looks as if we will go over the 400 mark within the next two months."

"We intend to extend the long distance facilities north to Flin Flon during the present season and we have set aside \$19,000 for this work."

Mr. Coddington said that the long distance business originating in The Pas was far beyond expectations.

Pilot Has Freak Accident

British Airman Had Propeller Shattered
In Encounter With Hawk

Chico, Calif.—Victim of a freak airplane accident, Flying Cadet R. G. Hamilton, R.F.C., was forced down in a ploughed field near Cana, six miles north of here, with the propeller of his pursuit plane shattered the result of an aerial encounter with a hawk.

Cadet Hamilton, attached to the British airplane carrier, H.M.S. Hermes, now at San Diego, was flying from that city to Vancouver, B.C., when the freak accident occurred.

Prove King Is Recovering

London, England.—The papers are giving great prominence to the first photographs of King George, taken since his arrival at Craigwell House. They show His Majesty seated in a bath chair in the grounds with Queen Mary standing beside him. The photographs lend confirmation to recent reports of the King's favorable progress toward recovery.

W. N. U. 1777

Wants Canada To Develop Helium Gas

Operation Of British Dirigible Would
Necessitate Obtaining Gas Here

London, England.—Development of helium gas for use in airships in Canada is a possible development of the building of the giant dirigibles for trans-oceanic transport by the British air ministry, Sir Samuel Hoare, air secretary, intimated in the House of Commons. He said it was hoped to approach the Canadian government later to see whether it would be possible to produce helium in Canada as the gas is produced and used extensively in the United States.

The two airships, he hoped, would be ready to take the air by spring or early summer.

If the home tests are successful it is proposed to make a flight to Egypt and India, and then to Montreal.

Toronto.—Large quantities of helium gas can be produced from the gas wells of the Bow River Valley of Alberta, to the south of Medicine Hat. The production of helium in commercial quantities was first accomplished in Canada during the war as a result of researches made by Prof. J. C. McLennan, of the University of Toronto.

Helium is non-inflammable and though less buoyant than hydrogen, is much safer.

Fire Sweeps London Factories

Heavy Loss In District Occupied By
Paper Houses

London, England.—The biggest fire that London has experienced in a long time caused heavy damage on the south shore of the Thames in a district occupied by paper and tin factories. Three hours after the first alarm, flames were shooting 100 feet into the air, a whole series of the factories being ablaze.

A large part of London was illuminated by the blaze. Scores of fire engines and hundreds of firemen were trying to prevent further spread of the conflagration. They managed to avert danger from neighboring workmen's homes, although the families fled.

One of the losses in the fire was 400 tons of newsprint paper.

Heavy Snow In Colorado

Two-Day Storm Isolated Small
Towns Near Denver

Denver, Colo.—Small towns and villages in the Rocky Mountain region were marooned by snow that covered highways to a depth of three feet in places, following a two-day storm.

The storm area extended northward to the Canadian border, spreading a white blanket over Montana, Colorado and Wyoming.

A group of high school boys rescued Frank Nelson, 74, from his cabin near Mount Almagre, fifteen miles from the famous Cripple Creek mining district of Colorado, where he had been marooned without food.

The Disarmament Question

Britain and U.S. Must Agree In
Matter Says Balfour

Buffalo. The question of Anglo-American relations overshadows all other political topics in the interest of the British public, according to Sir Arthur Balfour, chairman of the British Industry and Trade Commission, which is conferring with the steel men.

"We feel, in England," he said, "that unless our two countries can work in agreement, the cause of disarmament is lost. We will lose the respect of continental powers and another war is on the way."

Was Hero Of Gallipoli

London, England.—General Sir Charles Newsham, who at an advanced age, served in the Gallipoli and Saloniki defences and was slightly wounded and mentioned in despatches, is dead at the age of 64 years. He retired in 1924.

Nobile's Resignation Accepted

London, England.—The Exchange Telegraph Company said it had been officially announced at Rome that General Umberto Nobile, commander of the ill-fated Italia expedition, had resigned his rank and office. The resignation was accepted.

SHOWS RECORD SURPLUS

Hon. James A. Robb, minister of finance, who introduced the budget in the House of Commons, on March 1, in which he trimmed down taxes, reduced debt and revealed a record surplus of \$69,782,000.

Expect To Complete Railway In April

Line To Churchill Being Steadily
Pushed Onward

Winnipeg.—Within sight of the sea, steel laying workers are pushing steadily onward to Fort Churchill, terminus of the Hudson Bay Railway, and early in April, unless the unforeseen occurs, will have completed their work.

Telegraph communication with Churchill was established for the first time on March 12, and steel is now within 12 miles of the port, stated H. A. Dixon, regional chief engineer of the Canadian National Railways, here. Construction material for work at the port already is en route north.

Many Applications For Assisted Passage

Approval Given Large Percentage Of
Prospective Settlers

London, England.—In the thirteen months ending January 31, 1923, 6,583 families and 28,468 individuals not included in families applied for assisted passage to Canada, Right Hon. L. C. M. Amery, secretary of state for the Dominions, told the House of Commons. Of these, 2,772 families, and 18,718 individuals had been approved and 2,140 families, and 15,381 individuals had sailed for Canada. These figures did not include the special scheme under which the party of British miners went to Canada as harvesters.

Left Large Estate

Toronto.—William Kellahe, ex-cabman of Toronto, who died recently at the age of 83 years, left an estate valued at approximately \$200,000. Mr. Kellahe, who arrived in Toronto penniless more than 40 years ago, willed \$150,000 to local orphanages.

"THE TEN-POUND SMILE"

A happy group of Britishers who have just arrived in Canada under the new ten-pound fare. Asked for comments as to the possible movement under this reduced rate, officials of the Department of Colonization and Development, Canadian Pacific Railway, say: "While we are hopeful, of course, that, consistent with the needs of the Dominion, many will take advantage of the opportunity afforded by the new rate, it is far too soon to state that much may be expected. Indeed there are indications that, apart from the first stimulus arising from the novelty of a new rate, the majority taking advantage of it are not looking for agricultural opportunities, and cannot therefore be readily placed through existing colonization organizations. The movement as a whole, therefore, may prove to be disappointing."

Auto Driver Killed Trying For Record

Machine Out Of Control Crashed
Into Sand Dunes

Ocean Speedway, Daytona Beach, Fla.—Lee Bible, 42-year-old Daytona Beach garage mechanic, rode to a spectacular death in the 36-cylinder racing car with which he was vainly attempting to break the world's speed record of 231 miles an hour, made by Major H. O. D. Seagrave, of England. Speeding at more than three miles a minute, the machine got beyond his control and crashed into the sand dunes, striking and killing also Charles Traub, a news reel cameraman. Bible left a wife and two children.

The accident, one of the most tragic in the history of beach racing here, occurred just after Bible crossed the measured mile course at a speed of 202 miles an hour, and was witnessed by a crowd of approximately 20,000 spectators who lined the sand dunes for miles.

To Fight "Red" Menace

Manitoba Command Canadian Legion
Asks Action Against Communists

Winnipeg.—Eradication of Communism from Canada and the prosecution of those responsible for its spread, was demanded in a resolution unanimously adopted at the fourth annual convention of the Manitoba command, Canadian Legion, British Empire Service League.

The convention also urged that the Communists be prohibited from holding meetings in public schools.

Communists, the delegates declared, were attempting to instill their doctrines into the minds of children and the newly-arrived immigrant. Communist ideals were being circulated in literature and songs "grossly blasphemous, seditious and contrary to the teachings of Christianity."

They would "demoralize youths and would lead to ultimate bloodshed, revolution and the breaking down of all religious and civil authority."

Want Police Force Similar To Mounties

Idea Suggested To President Hoover
To Stop Smuggling

Washington.—A federal constabulary, similar to the famous Royal Canadian Mounted Police, has been suggested to President Hoover as a means of ending liquor smuggling across the Canadian and Mexican borders.

The constabulary would deal not only with rum running, but also with immigration smuggling, and the ordinary run of merchandise smuggling operations now under the eyes of the customs service.

Russian Miners Killed

Moscow.—Twenty-seven miners were killed when a crowded cage fell in a shaft near Gorlovka, in the Donetz coal basin.

BRITAIN HAS NEW SCHEME TO HELP SETTLERS

Ottawa.—A new assisted passage scheme to provide Canadian farmers with British workers has been announced by the Department of Immigration. Young men in the British Isles who have not been able to find the present £10 steamship fare, are to be recruited and after examination, by Canadian immigration authorities, will be lent their passage money by the British government. The movement will start within a month, it is expected, and several thousand men will probably be brought out this year.

The proposal announced will embrace a limited number of unemployed miners, physically fit, but not necessarily of the skilled farmer class, who come under the present assisted passage scheme.

A survey of the various provinces is at present being conducted by the department and the number of men to be assisted will depend upon the demand for agricultural workers.

The new scheme is explained to be quite different from the miner-harvester scheme of last year. The men must demonstrate a desire to settle permanently in this country, and no provision is made to provide return fares at the end of the harvest. None of the expense is to be borne by the Canadian Government.

While applicants need not have farm experience, they will be carefully chosen with regard to physical fitness and willingness to accommodate themselves to conditions.

The new program is to be supplementary to the various assisted passage schemes already in effect. The most important of these is the £2 steamship rate for agricultural families, with free passage for children.

Estimates For British Air Force Criticized

Kellogg Pact Has Not Changed
Policy, Says Labor Member

London, England.—Joseph M. Kenworthy, Laborite member of the House of Commons, bitterly criticized the British Government in debate upon the 1923 estimates for the air force. He said the government's estimates bore no trace of any change in policy since Britain signed the Kellogg anti-war treaty.

Kenworthy criticized the "enormous cost" of the air station at Singapore and also the utilization there of young airmen and "expensively trained cadets."

"I could have understood it two or three years ago, before the signature of Great Britain was affixed to the Kellogg anti-war pact," he said.

A total of \$2,500,000, a fifth of which is to be spent this year, he said, is to be devoted to the Singapore station.

"If the station is merely for defence of a new dockyard, that is an extraordinarily large sum," he said.

Sir Samuel Hoare, secretary for air, replied that the expense is part of the general expenditure at the Singapore base, and that Singapore would be capable of handling the aerial side of any operations of the naval base.

"Even if there were no naval base at Singapore, the air base would be necessary," Sir Samuel said, "as it is the cardinal point of our communications."

Wins McKee Trophy

Award For Meritorious Service Given
To Western Air Ace

Ottawa.—Captain C. H. "Punch" Dickens, commercial pilot of Edmonton, Alta., has received the McKee trophy award for 1923, for meritorious service in the advancement of aviation in Canada. During the twelve months he spent a total of 1,035 hours in the air, a remarkable achievement when consideration is taken of the fact that Dickens performed most of his duty in the northern sections of the Dominion.

Announcement of the award was made by Colonel J. L. Ralston, minister of national defence.

Didsbury Pioneer

THE BURDEN OF A HALL

The Community Hall project, which is being sponsored by the Carbon Elks, has promoted considerable discussion on the subject and many are of the opinion that Carbon cannot afford to be saddled with a \$12,000 debt for the next decade or so. The drain on the business places would be too great, it is said, and although the Elks may be sponsoring the project, the individual would be paying for the building. But can those who look at the new community hall idea with the view that it is too great a debt for the community, realize what a small sum this really is when they consider the drain from the Carbon district by the mail order houses each year?

At the proposed way of financing the hall there would be a drain out of the community of approximately \$1500 a year. In that same period of time there is drawn from \$25,000 to \$50,000 via the mail order route. There is no comparison with the sums. \$1500 is not a large drain on the community if the people would look at the matter with a clear vision and after all, if the hall is to be built, it will be with local labor and material as much as possible and 50 per cent of this sum will remain in the community and be in circulation. And if we could but only keep 50 per cent of that mail order business at home we could easily afford that hall and there would be still \$15,000 more in circulation each year.—Carbon Chronicle.

THE COUNTRY WEEKLY

The following editorial appeared in a recent issue of Collier's Magazine: One cannot observe the press of America without keen realization of the clear line of demarcation that exists between the press of the cities and the press of the country. While both are functioning with the objective of public improvement, the metropolitan press, due perhaps to the sophistication of its patronage, seems to devote its energies to the detecting and exposing of evil operating along negative lines while the press in the rural districts follows the positive virtue of discerning and praising the good.

The rural press seeks to hold the public mind sternly to the truth, to resist the tendencies that work for the uprooting of the fundamentals on which our government is based, to teach moderation in thought and action, to adopt rational expression. This characteristic is not one that shows itself simply in spots. It is the universal standard of the weekly newspaper. It is the basis of its strength and provides a power that knows no parallel.

Those who have been raised in the atmosphere of a metropolis fail to sense the all-embracing power of the rural newspapers. They seem to think of the country press in terms of the individual small publication of six or eight pages, dealing in non-essentials that mark the life of the dreary Main Street. One week spent in the busy hive of an institution such as the American Press Association, representative of approximately 7,500 newspapers would open up such vision of the strength and power of the country that the magnitude of the city, so far as the influence of its press is concerned, would shrink.

The country press is an artery through which the life blood of the nation's trade must either flow or stagnate. Politically the country

LOCAL & GENERAL

Mrs. Bruno Jacobs left this week for Toronto.

Messdames Sharp, Ranton and Clarke motored to Calgary Tuesday.

Dr. W. G. Evans was a visitor to the southern city on Saturday.

Today (Thursday) is the first day of spring.

Mr. D. Dunlop of Edmonton was a visitor at the Ranton home on Monday.

Mr. N. Lammle was a business visitor to Calgary the forepart of the week.

Mr. H. O. Tonjum made a speedy business trip to Herbert, Sask., last week.

Mr. J. V. and Russell Berscht were visitors to Calgary the forepart of the week.

Mr. and Mrs. W. A. Teskey and Ed. Shand were visitors to the Turner Valley oil fields on Sunday.

Another Zane Grey knockout! See two brothers who hate each other! See Jack Holt, Doris Hill and Baccanova in "Avalanche," at the Didsbury Opera House, Wed, March 27.

C. Wrightson and Son of the Premier Meat Market will be in their new shop on or about March 27th. The new location is 1 door south of Scrutton's, the Photographer. 12-1c

Evelyn Brent, Clive Brook, Doris Kenyon and William Powell in a marvellous stupendous dramatic production, "Interference." Don't miss it. Opera House, Didsbury, Saturday, March 23.

Friends of Mrs. M. E. Clark, mother of Mrs. J. R. Miller, will be sorry to learn that she lost her balance and fell, breaking her leg at the hip. Rushed to the hospital, she is doing as well as can be expected.

Coming Events

A joint school program in aid of the Schools Fair Board will be presented at Community Hall on Mar. 22nd. Admission 50c. 11-2c

Boxing Contest, Didsbury Opera House, Thurs., Mar. 28th at 8:15. Twelve contestants, six from Calgary. Ring to be erected in centre of Hall. Proceeds for local gymnasium. See posters. 12-1c

Dance at Community Hall, Mt. View, Mar. 29th. Carstairs Mer. rymakers Orchestra. 12-1c

The Women's Guild of St. Cyprian's Church will hold a sale of Home cooking, etc., at the home of Mrs. R. Barrett on Thursday, April 4th. Tea will be served from 3 to 5:30 p.m. 12-2c

newspapers are the one dominating factor. There are approximately one hundred and ten millions of people in the United States. Of these about sixty million live and have their being on the farms and in the villages and towns up to five thousand population. Here we find an easy working majority whose power is reflected very largely in the legislation enacted in our national capital.

It is admitted to be next to impossible to pass legislation inimical to the interest of the farmer once the country press presents a united front in opposition. Wall Street, with all its reputed power and influence, is helpless in the face of the opposition of the American weekly newspaper.

Sixty millions of people, 58.2 per cent of our population is something that must be taken seriously into consideration; and it must be remembered that these sixty millions of people depend upon their home town newspapers for their local news, the one thing in which they are vitally interested.

The home-town newspaper, however, is more than a mere dispenser of news. It is the advisor, the friend in need, the counsellor at large for the community. It is a vital factor in the growth of the town and the lives of its residents.

The support of the country newspaper is enlisted for the building of the school, the church, the town hall and on through the various stages of the town's life and strength.

ITEMS OF INTEREST

The first group of fifty British boys coming to this province during the coming spring under the arrangement between the Provincial Government and the Overseas Settlement Board will arrive in Edmonton about March 28th. The boys will be given a month's course of training at the Provincial Schools of Agriculture at Olds and Vermilion before being placed in employment on farms in the province. A second group will arrive about May 1st and will be similarly trained and placed in farm work. Parties of young British women are expected to arrive about June 1st and July 1st. They will be given a month's instruction which will fit them to fill positions as domestic farm help throughout the province. Both the boys and girls coming forward under this arrangement have been selected through the office of Herbert Greenfield, Agent-General for Alberta in London. They are all said to be of the type most likely to be readily adaptable to conditions in Western Canada, many of them already having had experience in farm work.

The McKee trophy awarded for the most meritorious flying done in Canada in 1928 has been won by Lieut. C. H. Dickens of Edmonton. Special mention is made in awarding this honor to Lieut. Dickens, of his flight of 3,964 miles across the barren lands last September. During the past month while on a flight to Fort Good Hope, he crossed the Arctic Circle and has since returned to Edmonton from where he is engaged in making regular flights into the far north.

Some 2,000 Chinese ring-necked pheasants, 600 Mongolian pheasants and 3,000 pheasant eggs for hatching will be brought into Alberta this year, states C. A. Hayden, President of the Provincial Fish and Game Association. It is reported that the pheasants placed in several districts in the province last season have wintered very well and it is hoped that through the activities of the association and a number of local bodies, the supply of these desirable game birds will be greatly increased within the next few years.

Glycerin Mixture Stops Constipation

The simple mixture of glycerin, buckthorn bark, saline, etc. (Adlerika) acts on BOTH upper and lower bowel and relieves constipation in TWO hours! Brings out old waste matter you never thought was in your system. Don't waste time with pills or remedies which clean only PART of the bowels, but let Adlerika give stomach and bowels a REAL cleaning and see how good you feel.

GLIMPSES FROM THE PAST

20 YEARS AGO

A meeting was called of those interested in fire fighting last week and Geo. Liesemer was appointed fire chief and J. V. Berscht assistant.

The following are the candidates for this district in the coming provincial election: C. Hiebert, Independent; S. Scarlett, Conservative; J. E. Stauffer, Liberal.

15 YEARS AGO

The Cloverdale Creamery, a little south of town, was burned to the ground on Friday morning.

Born—On Sunday, March 15th, 1914, to Mr. and Mrs. D. Sinclair, a son.

10 YEARS AGO

Johnny Stevens was burnt last Saturday while starting a fire with coal oil.

S. Reiber is progressing favorably after an operation for appendicitis.

Married—Mr. Robert Mueller to Miss Diana Hill of Trochu, on Wed., Mar. 12, 1919.

Here and There

(219)

Boys at Red Deer, Alberta, earned Christmas pocket money by trapping. They brought in nearly 400 weasel skins in less than a fortnight and also coon, rabbit, squirrel and cat skins.

Further experiments with super-phosphate from the smelter at Trail, B.C., will be conducted in 1929 by the Alberta Department of Agriculture in conjunction with the Dominion Experimental Farms and C. P. R. experimental farms. An abundant quantity of this fertilizer will be available to meet demands.

MAY AND HARVEST PERIOD WORST FIRE LOSS

The 33rd Annual Meeting of the members of the Wawanesa Mutual Insurance Company was held in the I.O.O.F. Hall, Wawanesa, at 2 p.m., February 5th, 1929.

Mr. Henderson in a brief speech called the meeting to order and stated that during the 33 years that the Company had operated and which covered one-third of a century, he had been one of the original Directors and had attended each one of the 33 annual meetings and hoped to be spared to attend several more.

The Managing Director, Dr. C. M. Vanstone, then gave the Directors' and Auditor's report.

The annual levy for 1928 was made at the rate of 20% of the note and resulted in assessments amounting to \$436,352.65 being received. Cash premiums amounting to \$170,452.34 were received. The policies written on the cash plan increase year by year and now amount to 22 1/4% of the total business of the Company. Interest and rent brought in \$44,446.46, ordinary operating expenses amounted to \$201,103.48. Losses of a trifle over \$320,000 were paid, an increase of 50% over 1927. These losses occurred in two clearly defined periods, the first during the month of May and due to carelessly started fires in the time of the spring clean up, the second during harvest and due to poorly guarded stubble fires, particularly following the use of the combine.

The cash assets were materially increased and the total assets brought up to \$2,677,792.45 an increase for the year of almost \$200,000.

The year was remarkable in the Company's history in that a gain of almost 18 millions in volume was recorded for the year. The total insurance in force is now over 152 millions.

It took ten years of earnest effort on the part of the management to bring the Company up to a volume of 17 millions and we have every reason to feel gratified that we were able to put this amount of increase on in one year.

The retiring Directors were Messrs. Wallace and Reid who were re-elected. A vote of thanks was given to the Manager and Directors for the very able manner in which the business had been conducted.

Electric Power In Alberta

Transmission Lines Spreading Over Province At a Rapid Rate

The rapid rate at which electric transmission lines have been spread over the province of Alberta, especially during 1928, is indicated in a recently issued government report. A network of high tension lines now radiates east and west, north and south over the central and southern part of the province. There is a continuous line from Edmonton in the north to Magrath south of Lethbridge, in the south, with the exception of the gap of less than thirty miles between Millet and Ponoka still to be closed.

One power company, with headquarters in Calgary, is operating 332 miles of 66,000-volt lines and 839 miles of 13,200-volt lines. Of this mileage approximately 50 miles of 66,000-volt lines, and 474 miles of 13,200 volt lines were built during 1928, and the company's territory in the north now extends as far east as Wainwright and Hardisty.

Cutting Corns With Razor Leads To Lock-Jaw

Don't cut corns with an old razor blade. Infection, followed often by death may result from paring corns with an infected razor. Quick, safe relief comes from using PUTNAM'S CORN EXTRACTOR. If afflicted with corns, callouses or sore foot-lumps, use "PUTNAM'S"—it's reliable, and sure to shrivel up the corns so they drop right off. No pain, no soreness, but quick relief from sore corns comes to all who use PUTNAM'S PAINLESS CORN EXTRACTOR. 25c. at all dealers.

Sugar Beets a Paying Crop

Sugar beets proved the best-paying crop in the Taber-Barnwell irrigation district last year, returning an average of \$69.59 per acre. Alfalfa came second, with \$25.85 per acre, and wheat third, with \$23.27. The average production per acre in the project was worth \$28.97.

SPARKLING EYES AND ROSY CHEEKS

The Birthright Of Every Girl With Rich, Red Blood In Her Veins

The dull eye that goes with bloodlessness is a sure sign of misery and weakness. Anaemic—that is bloodless—girls and women have dull, heavy eyes with dark lines underneath. But this is not all. Anaemia works havoc all through the system; girls grow painfully weak and irritable; they are breathless and incapable of much exertion, while older women who are anaemic complain of being "never really well."

There is only way to bring brighter, better health for pale, pining girls and women. That way is to invigorate the body with new blood—rich, healthy blood that imparts strength and restores the bright eyes and rosy lips of perfect health. That Dr. Williams' Pink Pills make new rich blood and bring health and strength has been proved in thousands of cases. One such case is that of Miss Margaret White, Parry Sound, Ont., who says:—"I was attending high school and as examinations were coming on I was working hard, and began to feel easily tired, and often had severe headaches. When I sat down to a meal I felt that I did not want to eat. I went to a doctor who told me that I was anaemic. I took his medicine, but made little progress. Then my aunt, who had great faith in Dr. Williams' Pink Pills, got me a supply and I began taking them. I soon noticed that my appetite was improving, that the headaches came less frequently and that I was not so easily tired. I went away to camp for my holidays, taking the pills with me and taking them regularly. The result was that I returned home a healthy girl, my weight increased, my cheeks grew rosy and every ache and pain had vanished. I strongly recommend every weak girl to give Dr. Williams' Pink Pills a fair trial."

If your dealer does not keep these pills you can get them by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Tested Rocket Sled

A "rocket sled" was tried out at the Schleissheim aviation grounds by Max Valler, inventor of several rocket vehicles. The sled weighs 240 pounds and can be equipped with eight rockets. Valler, using only two rockets, made fine speed on level ground. Spectators tried to visualize the speed that could be made down a snowy slope under the impetus of the rockets, but gave up the attempt before reaching definite conclusions.

SUNDAY SCHOOL LESSON

MARCH 24

STEWARDSHIP AND MISSIONS

Golden Text: "It is required in stewards, that a man be found faithful."—Corinthians 4:2.

Lesson: Genesis 12:1-3; Deuteronomy 8:17, 18; Jonah 3:1-10; Malachi 3:7-12; Matthew 28:18-20; Acts 1:6-8; 13:1-3; 26:12-20; Romans 1:14-16; 1 Corinthians 16:2; 2 Corinthians 8:1-15; 9:1-15.

Devotional Reading: Psalm 9:1-8.

Explanations and Comments

Stewardship In Regard To Missions, Acts 1:6-8.—The apostles met Jesus on the Mount of Olives, and there they asked Him if at that time He would restore the Kingdom to Israel. Their question shows how well-nigh impossible it still was for the apostles to rid themselves of the common Messianic expectation of the Jews, that the Christ would rule over a Jewish nation independent of Rome and herself dominant, politically and religiously, over the other nations of the earth. "It needed the Pentecostal outpouring of the Holy Spirit to teach the apostles that Christ's Kingdom is not of this world."

"It is not for you to know the times or seasons, which the Father hath set within His own authority," was the answer of Jesus. "It implies that He will restore the Kingdom to Israel; not, however, to Israel after the flesh, as the apostles imagined but to the Israel of God, i.e. to Christian believers of every nation, by making Christianity the dominant religion."

"O God, I pray Thee for the childlike heart, That can enjoy—all vexing things apart— The beauties Thou in heaven and earth dost show, Nor fret myself with things I do not know."—Babcock.

And then Jesus promised power through the coming of the Holy Spirit, and gave His great commission: they were to be His witnesses both in Jerusalem and in all Judaea and Samaria, and unto the uttermost part of the earth. Some one has called these four missionary ones parishes, missions, state missions, home missions, and foreign missions. The Acts records the story of how the apostles carried out the commission. "The uttermost part of the earth" is represented by Rome, the capital of the Empire, the place where, as Irenaeus said, "All met from every quarter."

"This message always hurts me when I think of the vast tracts of earth that have never heard the name of Christ."—G. Campbell Morgan.

Rub It In For Lame Back.—Brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

A cast off railroad locomotive with its wheels removed, heats a Norwich, Connecticut passenger station. It performs efficiently, supplying heat to the train shed, station and cars in the yard as required.

Hard and soft corns both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

An armored vest and a breast machine gun, which starts shooting when the wearer raises his hands as the command "hands up," is a new creation for bank guards and night watchmen.

CRUMBLY TEETH

Help your children to have sturdy bodies, sound bones and strong teeth. Give them

Scott's Emulsion

rich in vitamins. It serves the needs of childhood equally as well as it does grown people.

Scott & Borne, Toronto, Ont. 25-60

A Great Canadian

Prof. Shotwell Was Close Adviser Of Woodrow-Wilson and One Of the Authors Of Kellogg Peace Pact

Mr. E. J. Garland and the Prime Minister deserve thanks for disclosing to Parliament recently that one of the real authors of the Kellogg Peace Pact is none other than a Canadian, Prof. Shotwell, of Columbia University. Canada has given many notable figures to the industrial, commercial and academic life of the United States. It is doubtful whether she has given anyone who has made a more distinguished contribution to the republic than Prof. Shotwell. Born in Canada and educated in Canada, Prof. Shotwell stands today as one of the most eminent figures in the whole scholastic field of the United States. His name, indeed, is known wherever international or world politics is discussed; the pity is that it is not better known among his own countrymen here in Canada.

Prof. Shotwell first arrested world attention when he became one of the close advisers of Woodrow Wilson in the sphere of foreign affairs. When the Peace Treaty of Versailles was in the making, he was in Paris; and later on, in pamphlets and numerous volumes and newspaper articles and lectures he has dealt with international questions with a scholarship and sure grasp of realities rivalled by few of his contemporaries.

Prof. Shotwell, in fact, must be ranked among the greatest of living Canadians. The pity is that, like many another, he is an exile from the land his talents could serve so well.

Nervous and Run Down The Least Noise Would Bother Her

Mrs. R. Burton, Oshawa, Ont., writes:—"Three years ago I was so nervous and run down I could hardly bear to have the children make a noise it would bother me so."

"A friend advised me to take

and after taking two boxes I began to feel stronger, looked better and the color came back into my cheeks, and now I am feeling fine again."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Western Progress

The thriving city of Regina established a notable record in 1928, in attracting new industries. During the last past year 12 important industrial concerns located in Regina. They are said to have expended about \$5,000,000 in sites, buildings and equipment, and they will employ well on to 2,000 men. Housing accommodation was built last year for 1,000 families, and building has not yet caught up to the demand.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

Change Bread To Cake

Here's the Magic Recipe

Cut slices of day-old white bread 3/4 inch thick. Trim off crusts. Cut each slice into strips 3/4 inch wide by 2 inches long.

Spread these strips on all sides with Eagle Brand Sweetened Condensed Milk, covering bread well.

Roll strips in dry shredded coconut, broken very fine. Place in pan and brown very delicately on all sides under low gas flame, or toast on a fork over coals.

Delicious little coconut cakes result—made from bread. Taste just like Angel Food cake.

Try them! This and dozens of other magic recipes are found in the Eagle Brand Cook Book "New Magic in the Kitchen." Write for your free copy to The Borden Co., Dept. BW, 140 St. Paul St. W., Montreal, mentioning this paper.

Take Daylight From Air

Reproduction Of Light Said To Be Next Wonder

A radio aerial draws radio waves out of the air. Radio treats essentially with sound. Absorption and reproduction of light, by a method strikingly similar to radio is likely to be next. R. T. Gee, London, Ont., inventor, president of the R. T. Gee Company, Limited, manufacturer of electric light bulbs, is the discoverer. The process, he states, is to be soon available for general use. When it is introduced, it is stated in scientific circles, it will revolutionize illumination, which is today chiefly created by electricity. For, in addition to drawing energy out of the air and reproducing it, Mr. Gee's method provides for the storage of such energy until it is needed. This means, it is explained, that the aerials at work in the daytime will not only absorb but also store sunlight for reproduction at night.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

CHAPTER XVI.—Continued

From up the mountainside came a drumming roar, and the rending crash of trees as the fire undermined their roots. Sparks from burning tree-tops crossed the fire-break and started other fires. To combat these, water had to be carried up the steep hillside in pails. Andy was among those delegated to this arduous task. For hours he staggered from stream to hill and back again with a brimming pail in either hand. Scorched by sun and fire, the perspiration streaming down his face and stinging his eyes, the little hero stuck gamely to his task.

"I 'ired on this 'ere job as a cook," he grumbled, "not as a blinkin' water-spout. Strike me pink, if the water I've carried today was sprinkled in 'ell the devil'd be out of a job. Oh, well," he added resignedly as he filled his pails and turned to again ascend the hill, "as Methusalem said, 'Every little bit 'elps!' These two buckets myke exactly four million, two 'undred and six gallons that I've carried this d'y." At this instant his foot caught in a root to send him sprawling on his face rolling down the mossy hillside, the pails clattering after. He lay where he had fallen, flat on his back, with arms outstretched. "There," he soliloquized, "that was the wisp of straw that broke the elephant's back. To 'ell with the fire. Let the blighter burn."

Wilkinson came wearily down the hill. His face was blackened and blistered, his hat gone, and his shirt a network from holes burned through the cloth by flying sparks. He sprawled on all fours by the stream, drank sparingly, then plunged his face in the cooling waters.

"Elo, Wilkie!" shouted Andy, "ow would you like to 'ave a cold bottle of beer?"

Wilkinson seized a stone threateningly and glared at his tormentor. "Men have been killed for less," he growled huskily.

"I s'y, Wilkie," grinned Andy, "these Forestry jobs are a snap. Do

you 'ave the nerve to collect a salary?"

The district ranger was too tired for speech. His swollen face puckered in a smile and he passed on up the hill, and Andy came stiffly to his feet and resumed his never-ending task.

Connie brought reports that the fire was being held on the north and east. The fire-break on the south held, but spot fires were kept in check only by the almost superhuman efforts of the fire-fighters.

Forest fires reach the peak of their intensity while the sun is hottest. With darkness the wind subsides, and, especially in the mountains the heavy dews are a never-failing help.

The sun, showing blood-red through the smoke, now sank behind the hills and a blessed coolness filled the air. The fire smouldered along the fire-breaks, but the dreaded sparks were not flying. The trembling roar diminished to a steady crackling where fallen trees were being steadily consumed.

The fire-fighters, their shoulders drooping, and wavering from sheer weakness, plodded down the hill for well-earned food and rest.

"You'll have to be at it again at daylight," said Wilkinson grimly. They nodded a tired assent. Wilkinson and Donald with twelve men patrolled the fire area throughout the night.

The next morning broke sullenly in a dull haze. As the first streaks of light heralded the coming of the new day, the fire-fighters again took up their posts. Men from the other mill arrived, and another day of battle with the fire demon was begun. An attempt was made to check it on the west front, high up the mountainside, where the fire had crept through in the night to a small level plateau. At ten o'clock the wind came suddenly, and with it the fire broke through on the south-west corner with a deafening roar and rushed through a stand of dead trees with ever-increasing speed.

Donald shouted a quick cry of warning to the men who were in danger of being cut off by this break. They came on the double quick just in time, as a lurid wall of flame shot up the hill over the path they had traversed.

"Are the men all out?" questioned Donald.

"Andy isn't here!" said one of the men excitedly.

Donald seized the speaker's arm. "Was Andy with you?"

The man nodded.

Donald's face set in grim lines. Whirling quickly, he ran straight toward the line of fire. With a bound Connie was on her horse and after him at swift trot. As he neared the screen of smoke, Pegasus changed his gait to that of a mad runaway, and with the small rider lying prone on his bare back disappeared from view.

At this spot the fire had spent its fury in the first mad rush, but a heavy smoke welled up from the charred ground. Terror possessed the horse, but the calm voice of his mistress urged him on. Crimson embers showered about her. Scorching heat fanned her face as if the doors of a blast furnace had been opened. A blazing branch fell with a rushing sound, barely missing the horse's head. Sharp reports from the tree-tops made the plucky cayuse shy in a panic of fear.

Filled with apprehension, the crowd of fire-fighters stared with tense anxiety into the drifting smoke. Then a glad cheer burst from them as horse and rider emerged.

Andy clinging to Connie's stirrup and Donald swaying drunkenly in the rear. Ready hands held water to Andy's parched lips and bathed his hot face as he lay panting on the ground. He sat up with an effort and looked about him. "Where's Connie?" he asked. But Connie had stolen quietly from the scene.

By mid-afternoon the main body of the fire was apparently under control, but the persistent spot-fires kept the entire crew engaged. A huge cottonwood, standing just within the fire-breaks, was the chief offender. Sparks from its lofty blazing top were floated by the breeze to land on the dry ground, starting innumerable fires.

"That tree will have to come down or we will be fighting spot fires indefinitely," said Wilkinson.

Silence fell. Everyone of those lumber-jacks knew the danger attached to the falling of a rotten, blazing tree. In sound timber the skilled "faller" can cut the scarf and drive the falling-wedge to lay the tree within six inches of the desired spot. With a hollow tree the task is much more difficult, as in the soft, decayed pulp the wedge may not provide sufficient leverage to swing the enormous weight, and the tree may crash from any angle.

Men working at the butt of a burning tree, too, are exposed to the fall of branches. Even a small bough, hurtling from the dizzy height of lordly cottonwood or fir, will break a man's limbs.

Wilkinson picked up a falling saw. "Who will go with me?" he called.

Gillis stepped forward with wedge and hammer.

"Nothin' doin'," said little Blackie; "Wilkinson here has a wife and kid, an' Jack has brains enough to be our boss. Me and Hoop-la ain't got neither, we're just a couple rough-necks. Whadda you say, Hoop-la?"

"Ye betcha," came vigorously from Blackie's pal.

Two men were sent with them to assist in clearing a space at the foot of the big snag. A few minutes later the twang of the cross-cut, mingled with Blackie's happy song, sounded above the crackling of the fire.

Wilkinson pointed to the southern sky, where heavy nimbus clouds were massing. "At last! The blessed rain is coming!" he cried in a voice of thankfulness.

A stronger gust swept through the valley to send a surge of flame from the giant cottonwood's topmost branches. There was a sharp cry of warning as a limb broke off with a splinter-crash and came roaring to the ground, sending up a swirl of dust. A strangled cry of pain, animal-like in its intensity, cut the air.

—take it!
It's Safe

The nurse tells you to take Aspirin because she knows that it is safe. Doctors have told her so. It has no effect on the heart, so take it to stop a headache or check a cold. For almost instant relief of neuralgia, neuritis, rheumatism; even lumbago. But be sure it's Bayer—the genuine Aspirin. At druggists, with proven directions for its many uses.

Aspirin is a Trademark Registered in Canada

ASPIRIN

"Blackie's hit," screamed Hoop-la. Blackie lay on his face, his clothing afire, pinned down by the shattered limb. With a heave of powerful shoulders Hoop-la flung the crushing weight aside, and his big hands quickly smothered the fire in the clothing of his fallen comrade. Gently he raised the stricken man in his arms and bore him beyond the range of fire.

"Blackie! Oh, Blackie! are you all right?" he questioned fearfully as he looked down at the quiet face that

held the grey pallor of death. "Call the doctor and bring a stretcher," sharply ordered Wilkinson.

(To Be Continued.)

Taken Without Question

There are times when we question the pronouncements of the learned, but one of the things we have decided not to prove for ourselves is the recent statement of a prominent naturalist that lions are near-sighted.

WINDOLITE

The Improved Glass Substitute

MADE IN ENGLAND

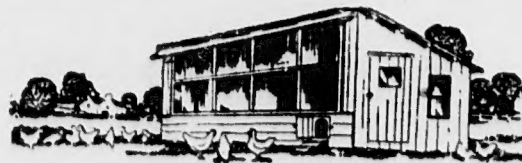

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 150 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Mountain View Notes

We are pleased to report the marriage of Mr. Odmund Aussenhaus, a native son of our community, to a young lady from Edmonton. They will reside on the J. D. Ward farm which Odmund purchased last fall.

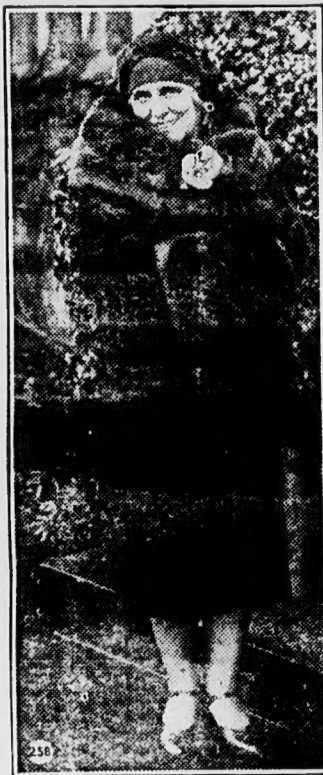

Mr. L. Kahut has returned to his home after an operation in the Didsbury Hospital.

The oyster supper, whist drive and dance at Community Hall was a great success.

Don't forget the School Fair entertainment, Friday, March 22nd and the dance, March 29th with Carstairs' orchestra.

WESTCOTT

The audience at our last meeting on March 13th was so large that our worthy president, Mr. H. O. Levagood, after desperately trying to find seats for every one told them to push the end out of the school. The program as usual was excellent. This coming Friday evening (tomorrow) we are having a debate on the new School Act. This should prove very interesting.

GERALDINE FARRAR

THE NECESSITY OF WATER AND MINERALS FOR POULTRY

We think of feed primarily in the production of eggs, and sometimes forgetting however that the eggs are composed of 65 per cent water. A liberal intake of water will increase egg production by stimulating feed consumption and giving the necessary for egg formation. Warm water is one of the primary essentials of winter egg production. When the flock goes off feed in a cold spell, egg production drops considerably. This is caused by the water being too cold or none at all. Give your hens lots of warm water and have them produce eggs when prices are high. Over one-third of the solid part of a hen's egg (that is one third of all the egg except the water it contains) is composed of two minerals—lime (calcium) and phosphorus. They are found in very small amounts in most farm feeds. The other two-thirds are made up chiefly of carbon, nitrogen and sulphur, which minerals are abundant in your ordinary feeds.

Poultrymen have long known the importance of lime for eggshell and know the need of phosphorus in producing eggs. Oyster shell, this natural mineral food is produced from vast deposits of lime and phosphorus in the exact proportions suited for poultry needs. (Tri-calcium phosphate is a food.) Oyster shell is free from conglomeration of chemicals or drugs. It is a food and should be used as such. Use oyster shell in your poultry mash and feeds. It builds up bones in your young chicks, develops large frames for heavy egg layers, supplies the needed egg-producing material and makes hard shelled hatchable eggs. Mix 5 lbs. to every 100 lbs. of mash. Have a supply of clean oyster shell in the hopper at all times.

Charcoal is very essential for the health of your flock as it removes gasses from the grain and sterilizes the food consumed. One pound of powder charcoal mixed in a 100 pounds of mash will help to keep your flock in a healthy condition summer or winter. Grit is necessary for poultry as they have no teeth. Keep the hopper supplied with clean grit at all times.
